github.com/slimourlissene

Profile

Fullstack engineer with 3+ years building and scaling digital products used by 100k+ users. I care equally about clean architecture, infrastructure cost, and the user experience on the other side of the screen. Comfortable owning features end-to-end — from product scoping to production deployment.

French national, available immediately to relocate to Dubai.

Selected Work

Eloqa

EDTECH · REACT NATIVE

Mobile app with 90k+ downloads and 100k+ users. Ship features and maintain the app in production.

Pedago

INTERNAL PLATFORM

Pedagogical platform for ETNA's education team. Central hub to oversee student cohorts, project groups, academic modules, and virtual machine allocations.

Hub

BACKEND · MONOLITH

Core monolithic backend replacing a legacy microservices stack. Redesigned for maintainability and reliability for a lean, frequently rotating engineering team.

QuandMonCSE

LEAD GEN · OPEN DATA

B2B lead generation platform leveraging French open data. Companies enter their SIRET to automatically retrieve upcoming CSE renewal dates.

Search Engine

INTERNAL TOOLING

Internal prospecting search engine over the SIRET open database. Lets sales filter, segment, and export targeted B2B prospect lists.
